SUMMARY :

Dedicated front-end developer with a strong focus on creating innovative and user-centric web solutions. Proven ability to deliver high-quality applications while ensuring an optimal user experience and adherence to best practices.

EDUCATION :

Chameli Devi Group OF Institutions, Indore | Bachelor of Technology | Nov 20 – Jun 24

TECHNICAL SKILLS :

- **Frontend-** JavaScript, React.js, Redux, Bootstrap, Tailwind-CSS, Material UI, GSAP.
- **Languages-** C++, JavaScript.
- **Tools-** VS Code , Git, GitHub, Ms Word.

EXPERIENCE :

VidyaGxP | inSite — Frontend Developer Intern | Sep 2025 – Present

- Built an enterprise-grade Medicef eLogbook application using React.js, React Router, and Tailwind CSS to deliver smooth and well-structured user workflows.
- Implemented secure user authentication, role-based access control, and a fully responsive UI for analysts, reviewers, and admin users.
- Utilized React.js for UI development, Context API for state management, and Tailwind CSS to ensure scalable, maintainable, and consistent styling across the application.

PROJECTS:

Repair Service Center Website – Frontend Development (live)

Tech Stack: React.JS,Tailwind CSS ,React-Router-Dom, GSAP.

- **Project Overview:** Developed a modern, responsive Repair Service Center website to provide customers with a seamless online experience. The website not only showcases repair services but also features a section for offline product sales like spare parts and accessories. Users can easily browse products and get detailed information.
- **Key Features:** Smooth animations, responsive design, and seamless user experience.
- **Technical Implementation:** Built using React.js with component-based architecture for scalability and maintainability. GSAP animations for scroll-triggered effects, hover animations, and engaging page transitions.

Medicef Elogbook – Frontend Development

Tech Stack: React.JS,Tailwind css ,React-Router-Dom, Material UI, React Icons.

- Built an enterprise-grade Medicef eLogbook application using React.js, React Router, and Tailwind CSS for smooth and structured user workflows.
- Implemented secure user authentication, role-based access, and responsive UI for analysts, reviewers, and admin users.
- Used React.js for UI development, Context API for state management, and Tailwind CSS for scalable and consistent styling.

Employee Management Website– Frontend Development

Tech Stack: React.JS,Tailwind css ,React-Router-Dom Context API, local Storage

- Built an employee management website with React and Tailwind CSS for efficient tracking.
- Added features for managing employee records and task assignments.
- Used local storage for data persistence without server-side dependencies.
